"DESIGN IS THE ART OF COMBINATING
FUNCTIONALITY WITH AESTHETICS"

I carefully select for the character, lifestyle, worldview of each client. Professional experience in the field of interior design and renovation, an informal approach to the project as a result gives the result - a comfortable interior, a stylish functional space, where every design decision is justified aesthetically and functionally.

APARTMENTS IN MARBELLA, SPAIN

The rich interior inspires with complex textures, geometric shapes and exclusive solutions. A fireplace decorated with liquid marble and a large amount of greenery have definitely become integral parts of the interior.

It is impossible to imagine a modern interior without a beautiful, spacious and functional kitchen, equipped with the latest technology, the design of which contributes to spending a lot of time here with the family, preparing meals and having heart-to-heart conversations. The planning solution of the kitchen, the design of the headset always require detailed professional processing.

VILLA IN SEVILLA, SPAIN

170 M2

A lot of our customers collect art objects. At an early stage of the design project concept, we make sure to determine how and where the existing collections will be located and plan the location based on their scale, relative to the house/apartment and the wishes of the customers. For exceptionally large collections, of course, we recommend a separate room that will play the role of home exhibition space. And single elements of art, paintings and sculptures can be a luxurious center of attention of any interior.

APARTMENTS GOLDEN MILLE, MARBELLA, SPAIN

The apartments are designed by our studio in Marbella, Spain in calm, silky tones. Large windows and a calm range of colors fill the room with light and sunshine, which creates an atmosphere of life and comfort.

We develop projects of heating, ventilation and air conditioning and drawing scheme
